

Newton Tony CE VC Primary School

In June 2019, four children in our school participated in the Year 1 Phonic Screening Check. Due to our small cohort of children each child represents 25%. We are delighted to announce that **three children reached above the required standard**. The standard is that a child can read a minimum of 32 out of 40 words during the check. The child that did not reach the required standard will be having Project X Phonic intervention to ensure the required standard is met in June 2020.

See our School Phonics results section for additional details.
